AEH-510

Azimuth and Elevation Head

Point, adjust and orientate test antennas

The AEH-510 Azimuth and Elevation head assists test engineers in orientating the compliance antenna towards the EUT.

Features

- Nylon construction
- Standard 1/4-20 mounting threads

The AEH-510 Azimuth and Elevation head is used to assist the test engineer in pointing the mounted test antenna towards the device under test. This adjustable antenna mount has a rugged 4" mounting surface with a Captive 1/4-20 male thread for mounting all of A.H. Systems and most other compliance measurement antennas.

Mounting Surface: 4" (10.1 cm)

Weight: 0.7 lbs (317g)
