

AK-ADP-LF

Low Frequency Adapter Kit

A Selection of commonly used adapters. The ultimate interconnect solution for low-frequency RF testing.

Features

- High precision machining
- plated for corrosion resistance and long life
- Inter-series compatibility
- Rugged storage case
- Three Year Warranty

Covering the essential low-frequency spectrum, the AK-ADP-LF ensures you always have the right connection on hand, eliminating downtime and allowing for rapid prototyping and troubleshooting in any environment.

Included Equipment	Description	Quantity
TSC-ADP-LF	Small storage case	1
ADP-222	N(f) to BNC(f)	2
ADP-202	N(f) to BNC(m)	2
ADP-201	N(m) to BNC(f)	2
ADP-230	BNC(m) to BNC(m)	1
ADP-214	BNC(f) to BNC(f)	1
ADP-204	N(m) to N(m)	1
ADP-215	N(f) to N(f)	1
ADP-208	N(m) to N(f) 90 degree	2
